

## 2013 Fertilization Program

### **1<sup>ST</sup> Application** – March/April

Seasonal Early Spring Fertilizer promotes a quick green up providing the nutrients your lawn needs to come out of dormancy and produce a healthy root system immediately.

### **2<sup>nd</sup> Application** – May

Seasonal Fertilizer with Iron to promote deep green color during spring and summer months, pre-emergent crabgrass control and broadleaf weed control.

### **3<sup>rd</sup> Application** – June/July

Slow Release Seasonal Fertilizer + broadleaf weed control.

### **4<sup>th</sup> Application** – July/August

Broadleaf weed control/spot treatment + Customer lawn analysis and survey to identify potential insect and grub problems. Post Emergent crabgrass controlled if necessary.

### **5<sup>th</sup> Application** – September/October

Slow Release Seasonal Fertilizer + broadleaf weed control.

### **6<sup>th</sup> Application** – November/Early December

Seasonal Winter Fertilizer (Winterizer) applied to turf for winter root growth and disease resistance.
